

Wet vacuum cleaning

| | Description |
|------------------------|---|
| Definition / objective | Removing the dissolved dirt and the remaining cleaning solution or the dirty liquid from floor coverings using the wet vacuum cleaner with water nozzle. Suitable for water-resistant floor coverings. |
| Preparatory work | Select suitable products to match the surface to be cleaned (type / square metres) and the type of soiling. |
| | Check, equip and ready the machine and all accessories in compliance with the instructions for use |
| | Put up the warning sign. |
| | As a general rule: Wet scrub or wet mop the floor covering beforehand. |
| Main task | Wet vacuum the floor covering using the wet vacuum cleaner in slightly overlapping passes. Start at the door and work your way into the room. Note: Always stand in the dry area. |
| | Once the tank of the wet vacuum cleaner is full, pour the dissolved dirt and the vacuumed cleanin solution down the drain. |
| | Perform a visual check. |
| Final steps | Pour the waste water from the tank of the wet vacuum cleaner down the drain. |
| | Rinse the tank, the suction nozzle and the hose with water. |
| | Check the power cable for visible damage, clean the cable and roll it up loosely towards the plug. |
| | Remove the warning sign once the floor covering is dry. |
| | Dispose of any waste. |
| | Clean the cleaning equipment and replace as needed. |
| Comments | Wear the personal protective equipment (PPE) required by company regulations, safety data sheets and / or instructions for use. Always check in advance which product meets your requirements (see Wetrok Cleaning & Care Instructions). Wetrok AG accepts no liability for damage caused by improper use or incorrect product selection. |
